

Abd Alrahman Alsaadi

Software Engineer | Full-Stack Developer

Syria, Damascus | alsaadiabdalrahman5@gmail.com | +963 994493352 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Full-Stack Software Engineer with strong expertise in backend development using Laravel and PHP, complemented by hands-on experience with React and JavaScript. Experienced in building scalable web applications, designing RESTful APIs, and developing secure systems following clean architecture and SOLID principles. Passionate about building reliable, maintainable, and high-performance software solutions.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript
 - **Backend & Frameworks:** Laravel, RESTful APIs, Laravel Sanctum
 - **Frontend:** React, React Router, Responsive Web Design, HTML5, CSS3
 - **Databases:** MySQL, PostgreSQL, Database Design
 - **Architecture:** MVC, SOLID Principles, Service Layer Architecture
 - **DevOps:** Docker, GitHub Actions (CI/CD), Load Balancing
 - **AI & Integrations:** Gemini API, OpenAI API, Stripe API, Pusher, Firebase Cloud Messaging (FCM)
 - **Tools:** Git, GitHub, Postman, SwaggerApi, Apidog
 - **Other:** Authentication & Authorization, Agile Development
-

PROJECTS

Construction Finishing Management System | Jan 2026 – Present

- Engineered a scalable Laravel backend for a construction finishing management platform, enabling project planning, resource management, contract administration, financial tracking, and AI-assisted decision support
- Built secure RESTful APIs with authentication and role-based access control (RBAC) to support multiple user roles and permissions.
- Developed intelligent AI features for project analysis, engineering recommendations, and construction image visualization to assist decision-making.
- Integrated real-time notifications and project update workflows to improve communication between project stakeholders.

- Designed a scalable and maintainable backend architecture by applying SOLID principles and service-oriented design.
- Link: github.com/graduation

Pharmacy Management Web Application | 2026

- Built a responsive React-based web application for managing pharmacy operations and medication inventory.
- Created reusable React components and structured the frontend using a modular component-based architecture.
- Created dynamic user interfaces for managing medicines, products, categories, and pharmacy-related data.
- Integrated frontend workflows with RESTful APIs to support data retrieval, management, and real-time user interactions.
- Applied responsive design principles to provide a consistent user experience across desktop and mobile devices.
- Link: github.com/PharmacyWeb

Complaint Management System | Jan 2026

- Engineered a secure Laravel API for a citizen complaint management system, focusing on security, scalability, and maintainability.
- Configured authentication with Laravel Sanctum, role-based access control using Spatie Permissions, and complaint workflow management
- Improved data integrity through database transactions, audit logging, and reliable notification handling.
- Optimized system performance with Redis caching, pagination, and real-time notifications using Firebase Cloud Messaging (FCM).
- Link: github.com/Complaint-system

Shipping & Logistics Management System | Sep 2025

- Architected a scalable RESTful API for a multi-center shipping and logistics platform, managing the complete shipment lifecycle from booking to final delivery.
- Automated geolocation-based shipment assignment, driver dispatch workflows, and QR/barcode verification to streamline logistics operations.
- Integrated Stripe payments, Pusher real-time notifications, and Laravel Queues to support asynchronous processing and improve system responsiveness.

- Designed a modular service-layer architecture with Laravel Sanctum, Spatie Permissions, and optimized database queries to ensure security, maintainability, and performance.

EDUCATION

Bachelor of Information Technology Engineering

Damascus University 2021 – Present (Expected Graduation: 2026)
